Maths

Vectors	3D Geometry
Sequence and Series	Determinant and Matrices
Circles	Straight Lines
Definite Integral	Probability Distribution
Functions	Limits and Continuity
Conic Sections	Application of Derivatives
Quadratic Equation	Complex Numbers
Binomial Theorem	Area under the Curve
Differentiability	

Physics

Ray Optics	Thermodynamics
Semiconductors	EM Waves
Gravitation	Magnetism
Alternating Current	Wave Optics
Electromagnetic Induction	Oscillations
Kinematics	Rotation
Current Electricity	Electrostatics
Magnetic Effects of Current	Properties of Matter
Bohr's Atomic Model	Waves and Sound

Chemistry

Gaseous and Liquid State	Atomic Structure
Chemical Kinetics	Electrochemistry
Chemical Bonding	Surface Chemistry
Coordination Compound	D Block Elements
Aromatic Compounds	Alkyl Halides
P Block Elements	Thermodynamics
Isomerism	General Organic Chemistry
Carboxylic Acids	Aldehydes and Ketones
Nuclear Chemistry
